Viewer 099 Session Report  
Date: 18 April 88  
Time: 1523 - 1548

*AOL*  
Summary: Hot environment, like "siesta" time of the day. From an overhead perspective, my attention is drawn to burning structures located in the northeast part of the city. There is the impression that something (munitions) rained down from above (AOL-rockets/artillery from the hills, or an air attack). The whole city seems to be the target (objective); this is just one event in an ongoing series of "raids" with no apparent critical target (AI-senseless act). Still have the impression (see last session) of a "supporting" small arms attack to the north of the city, but this may have happened at another point in time. (Also, the AOL(?) of a fire on a dock, southwest of the city).  
*AOL* - Seems like [ho-hum] "native" vs "native" engaged in the typical ideological-political conflict, even though one or both groups may be supported by "outside elements". The attackers are like "a card played" by the bureaucrat-official (see previous sessions) in another place--he is smug and expectant with regard to this attack. *HOL*

[Strong AOL of Central/Latin America/Mexico City]  
[Also present was AOL of US Embassy bombing (US Marine casualties), Beirut]
